## About Us

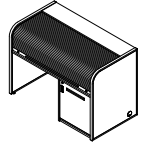

Miller's Presentation Furniture is a manufacturer based in Western New York, specializing in solutions for the professional audio-visual industry. Founded in 1996, Miller's has steadily grown to serve the AV furniture needs of integrators, colleges and universities, corporations, and government organizations nationwide. Our philosophy is simple: understand each client's exact requirements, deliver a high-quality product, meet promised timelines, and provide exceptional service long after installation.

Every Miller's product is hand-built in the USA using high-quality, GREENGUARD® certified, formaldehyde-free materials, ensuring durability, safety, and compliance with modern indoor air quality standards. That same attention to detail extends to our delivery process. Whether transported on our own trucks or through third-party carriers, each piece is professionally packaged using custom-built pallet bases, reinforced crating, and impact-absorbing protection to minimize vibration, moisture exposure, and handling damage. The result is furniture that arrives on site exactly as intended, ready for installation and built to perform for years to come.
